

Note to Caltech Shipper:

The Caltech International Shipment Form will become a permanent record in the U.S. customs office. The U.S, and the foreign country of destination's export and import control requirements are dependent on several factors, such as: type of commodity being exported/imported, end-use, country of destination, and end-user.

Instructions for completing the Caltech International Shipment form:

1. **Complete the form:** Avoid delays! Provide as much information as possible. The information provided by you in the Caltech International Shipment Form must be an accurate and complete declaration of what you are exporting -- description, quantity, value, end-user, end-use, etc. Wherever possible, please provide a link to the commodity's technical specifications or a link to a white paper that will help us to determine if government controls will apply to your shipment.

Know before you ship! Don't know? Ask the foreign party what is the item's ultimate end-use before you export.

2. **Value:** The **Customs Duty Value** of an item cannot be zero. You may use repair value, replacement value or sales price depending on nature of your transaction. See Customs Duty guidance to determine value for Customs duty purposes: <https://export.caltech.edu/shipments>.
3. **CEC Review:** The Caltech Export Office will review and return the form to you with the required information that will allow your shipment to clear Customs and to comply with the applicable U.S. government regulations, such as the Export Classification Control Number (ECCN) and the license determination; and HTS/Schedule B.
4. **Signature:** Please sign the form.
5. **Copies:** Caltech Mail Services/Shipping & Receiving require: original plus two copies of the signed Shipment Form. (This document will travel with your package to clear Customs.) Please email a signed copy of the final Shipment Form to export@caltech.edu and keep a copy for your files.
